

Aqualux LED light for land based fish farms

Aqualux LED is based on years of experience with light in fish farms and hands on management of fry and smolt farms

Light can be mounted on a rotatable pole, 1-2 meters above the tank.

Advantages of Aqualux

A biologically correct light for fish!

- ▶ Reduces maturation
- ▶ Stimulates growth
- ▶ Provides excellent light coverage
- ▶ Extends the feeding day
- ▶ Easy installation
- ▶ Energy efficient

Aqualux LED is a robust and well designed product ideal for both stimulating fish and illuminating the working environment

Our standard fixture with a special mixture of light. This mixture has proven both effective and comfortable for fish, as well as serving a good working environment. The fixtures have in-built protection against over-heating. The light is dimmable and has soft start.

SHOVEL

Aqualux Shovel LED comes with effects of 300 W in one device. The model has a high efficiency, 120 lm per watt.

The fixture is designed to have efficient cooling of the LEDs, and operate at reduced power to ensure long life and operation free of interference. The device has built-in power and comes with a connection cable.

Technical data Aqualux LED

Power: 300 W
Double fuse: YES
Color: Emerald mix
Light yield: 110 lm / W (emerald)
Radiation angle: 70 x 150 °
Life expectancy: > 50,000 hours
Enclosure: Enamelled aluminum
Degree of protection: IP 66
Voltage: 90-260 V, 50/60 Hz
Power factor: > 0.92
Power supply cable: 3 x 1.5 mm
Standard cable length: 10 m
